Profile

- **Enterprise AI and GenAI transformation leader with a decade of experience** across pharmaceutical / healthcare, insurance, and consulting environments — currently leading the global advanced analytics and AI function for a top-5 global pharma company across 30+ markets.
- **Established the flagship Agentic Marketing Mix Modelling programme** — a board-level priority now live in 5 markets, delivering approximately 30% commercial spend reduction through a fully in-house multi-agent system with orchestration, memory, retrieval, and human-in-the-loop controls.
- **Designed and launched an enterprise RAG and LLM agent platform** adopted by more than 10,000 internal users globally, generating over EUR 1.5M in savings and contributing approximately 12% EBIT uplift in key EU markets across a portfolio of 11+ AI solutions.
- **Hands-on GenAI depth across the full stack** — from LLM fine-tuning (SFT, DPO, GRPO) and agentic AI architecture to MLOps/LLMOps governance — with foundational consulting experience in pharma commercial analytics at ZS Associates.

Education

2025	University of Oxford , <i>Executive Diploma in Artificial Intelligence (91%)</i>
2018 - 2020	HHL Leipzig Graduate School of Management , <i>MBA in Strategy (1.6 / 5.0, Top 5 in the program)</i>
2012 - 2016	National Institute of Technology , <i>BTech in Electronics and Communications Engineering (8.88 / 10, Top 10 in the program)</i>

Work Experience

06/2022 - Present Darmstadt, Germany	Merck Healthcare KGaA — Associate Director, Data Science Global Advanced Analytics Lead Practice AI Lead, Healthcare Commercial (Global) • Owned the global advanced analytics and AI roadmap for Commercial Operations, co-leading EU go-to-market transformation and overseeing AI programme delivery across 30+ markets including EU, US, APAC, MEAR, and LATAM. • Established the company's flagship Agentic Marketing Mix Modelling programme — a board-level priority now live in 5 markets, delivering approximately 30% cost savings through a fully in-house multi-agent system with orchestration, memory, retrieval, and human-in-the-loop controls. • Designed and launched an enterprise RAG and in-house LLM agent platform that reduced research and administrative time by about 60% and generated more than EUR 1.5M in savings, adopted by more than 10,000 internal users globally across a portfolio of 11+ AI and ML solutions. • Built a domain-specific Marketing Mix Modelling agent by fine-tuning a 31B-parameter model through supervised training, preference alignment, and reinforcement learning — winning 59% of blind, judge-scored evaluations against a leading frontier model. • Defined and enforced MLOps and LLMOps standards across the AI development lifecycle — deployment, monitoring, observability, vendor capability evaluation, and governance criteria for emerging agentic AI technologies. • Built and coached the global data science and AI function across commercial, market access, and medical affairs — leading cross-functional delivery teams of 30+ across internal staff and external partners.
04/2021 - 05/2022 Munich, Germany	Allianz SE — Data Science Manager, DACH Lead Voice of Customer • Led a team of 10 senior specialists delivering 10+ analytics and AI solutions across customer and digital transformation programmes for DACH insurance markets, including Voice of Customer initiatives that delivered about EUR 100K in annual savings. • Built a best-in-class content-tagging pipeline using BERT (trained from scratch, fine-tuned, and transfer-learned) and topic modeling, adopted at enterprise-global level for customer feedback and intent processing. • Delivered two marquee executive board-priority projects — a next-best-action engine producing deterministic, per-customer outreach recommendations, and a proactive attrition analysis identifying customers at risk of churn with re-engagement targeting. • Led the regulatory engagement with BaFin to justify the use of deep learning models, and built GDPR- and EU AI Act-compliant systems throughout.

10/2019 - 03/2021
Munich, Germany

Allianz Germany — Data Scientist, Customer Journey Analytics Lead

- **Built an IVR feedback platform on AWS** using Kinesis, Transcribe, Comprehend, and Polly — lifting form-completion rates from roughly 20% to 90-95% and increasing customer feedback rates 5x.
- **Reduced customer product queries by about 30 percent** through automated claims-processing analytics, combining forecasting (Prophet, deep and shallow learning) with speech recognition (ASR, speech-to-text, shallow fusion) on CUDA/NVIDIA infrastructure.

08/2016 - 05/2018
Pune, India

ZS Associates — Business Analyst

- **Delivered commercial analytics consulting for global pharmaceutical clients** across incentive compensation, sales force effectiveness, and market access — building models, ETL, data quality monitoring flows, and BI layers across MicroStrategy, Power BI, and Tableau.
- **Owned ETL optimization for a client pipeline** moving approximately 4 PB of data weekly, reducing reporting time and infrastructure cost by about 40 percent.
- **Developed deep pharma commercial domain depth** spanning specialty and primary-care therapeutic areas, with structured problem-solving and stakeholder management across cross-functional client engagements.

Awards

- **2026: Merck Long-Term Incentive Plan (LTIP)** Equity programme for identified executive leadership talent
- **2025: Merck Executive Development Programme** Executive leadership development
- **2024: High Impact Award, Merck Healthcare** CEO + Board recognition for launching an enterprise-level GenAI + AI Agent platform
- **2023: High Impact Award, Merck Healthcare** Awarded by the CEO for shaping and guiding the Go-to-Market strategy for the EU
- **2020: Beta Gamma Sigma Fellow, BGS Honor Society** Lifetime fellowship given to the top 5% of post-graduate students
- **2018: DAAD Stibet Scholarship, Government of Germany** Merit scholarship awarded twice during the Master of Business Administration
- **2016: MHRD Research Scholarship, Government of India** National merit scholarship from the Government of India
